ECONOXX.com – the ecological and economical solution in the metal trading of semi-products

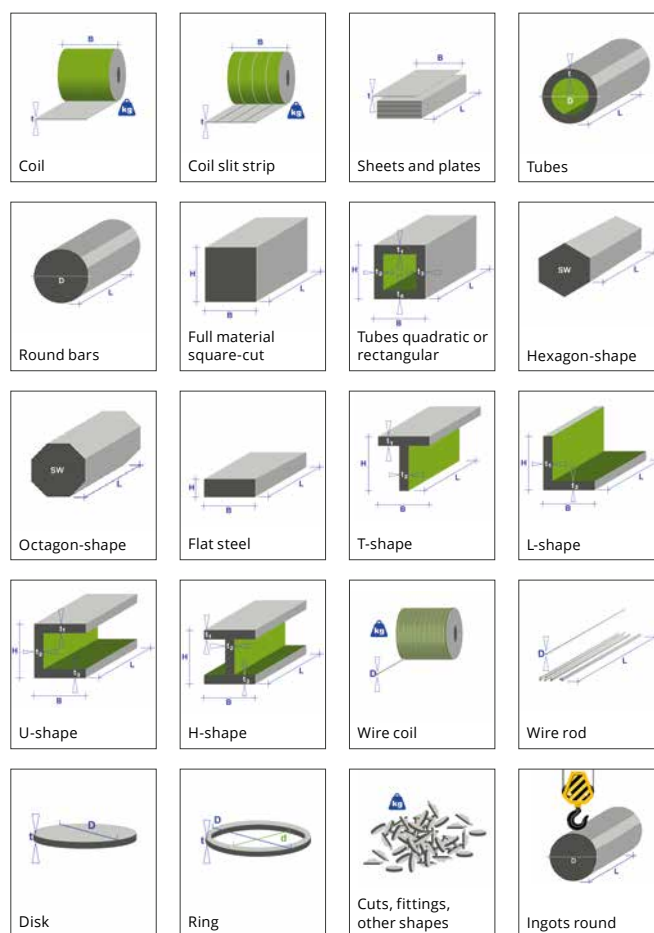

High quality offcuts, liquidation items and second choice material in stainless steels, nickel and titanium alloys tie up capital and are too valuable to scrap! Scrap should be re-used within the framework of a functioning circular economy and ultimately be made available to the steel mills again as efficiently as possible.

The metal trading platform ECONOXX.com has been promoting the sustainable use of scarce resources since 2016. Better use of offcuts and the increased recycling of stainless steel scrap in steel production reduce greenhouse gas emissions from approx. 6t CO₂ to an average of 2t CO₂ per tonne of stainless steel scrap used, which is equivalent to the consumption of 1800l of petrol. ECONOXX.com is designed to be self-explanatory and enables sellers to maximise the proceeds on their sales of offcuts in sheets, bars and tubes. Transactions are processed via the international and professional network of the Hempel Special Metals Group. This means that market participants always have a reliable contact person. ECONOXX.com offers buyers a new and uncomplicated procurement channel, which also covers small quantities and materials in special alloys at favourable conditions. If no buyer can be found, ECONOXX.com also takes the material back at scrap value and ensures that the scrap is recycled at the right steelworks. If of interest, ECONOXX.com also provides scrap boxes and collects them when filled. The trading platform is continually being developed offering a variety of additional services and is therefore enjoying growing popularity both nationally and internationally. Advantages of the trading platform

- Offer anonymously
- Advertise free of charge
- Large selection of materials
- Cheap small quantities
- Transparent offers
- Prices negotiable online
- Convenient buying and selling
- Efficient and secure processing
- Reliable and experienced partner
- Commission only on sale
- myEconoxx.com with individual cockpit

Market place

Services offered on the platform

- Transport service
- Cutting service
- Stock management for offcuts, liquidation positions and scrap
- Scrap recycling with/without boxes
