## Hempel Special Metals

Hempel Special Metals provides the best solutions for the demanding **process industry** when corrosion and heat resistant material for plant equipment and vessels is required. As an independent group operating globally, our focus is on consistent quality assurance and optimisation of the supply chain. We offer coils, strip, sheets, plates, tubes, bars and fittings from stock. We cut and machine our material where necessary according to customer specification. For flanges and tubes we stock the required primary material, so we can secure prompt production of the finished product with partner companies in order to guarantee on time installation in customer's equipment worldwide. We provide our services globally through our own service centres, agents or associated companies.

## Services

### We offer:

- 24-hour delivery service
- Call-off orders and consignment stocks
- Material testing and consulting
- Extranet and an e-commerce platform ([www.econox.com](http://www.econox.com))

### We process the material on our in-house:

- Plasma cutting machines
- Laser- and water jet cutting machines
- Shears and saws
- Slitter and precision slitter
- Decoiler
- Machining equipment

### We arrange:

- Forging, rolling, bending
- Tailor made parts
- Fastener production
- 3D-printing
